

## Contents

### Preface XIII

<b>1</b>	<b>Introduction</b>	1
1.1	The Meaning of Relativity	1
1.2	Weirdness of Light	10
1.3	A Steamer in the Stream	12
	Problems	15
<b>2</b>	<b>Light and Relativity</b>	17
2.1	The Michelson Experiment	17
2.2	The Speed of Light and the Principle of Relativity	22
2.3	“Obvious” Does Not Always Mean “True!”	24
2.4	Light Determines Simultaneity	25
2.5	Light, Times, and Distances	29
2.6	The Lorentz Transformations	32
2.7	The Relativity of Simultaneity	38
2.8	A Proper Length and a Proper Time	41
	Problems	43
<b>3</b>	<b>The Velocities’ Play</b>	47
3.1	The Addition of Collinear Velocities	47
3.2	The Addition of Arbitrarily Directed Velocities	50
3.3	The Velocities’ Play	53
3.4	Observable Manifestations	56
3.4.1	The Fizeau Experiment	56
3.4.2	Aberration of Light	60
	Problems	62
<b>4</b>	<b>Space-Time</b>	65
4.1	Minkowski’s World	65
4.2	Rotations in Space-Time (Representation in Euclidean Plane)	73

4.3	Lorentz Transformations as Rotations	81
4.4	What is Horizontal and What is Vertical?	87
4.5	General Lorentz Transformations	99
4.6	The Path Integrals	103
4.7	4-Vectors and Tensors	106
	Problems	120
<b>5</b>	<b>Relativity at Work I: Mechanics</b>	<b>125</b>
5.1	4-Velocity	125
5.2	4-Acceleration	130
5.3	4-Momentum	132
5.4	Relativistic Angular Momentum	137
5.5	Force and Motion	141
5.6	Mass and Energy	151
5.7	Mechanics From the Least Action	170
5.8	Relativistic Motion in Coulomb's Field	176
	Problems	185
<b>6</b>	<b>Relativity at Work II: Electromagnetism and Optics</b>	<b>191</b>
6.1	Electric Field and Something Else (The Origin of Magnetic Field)	191
6.2	Magnetic Field and Something Else . . .	205
6.3	Is Electric Charge Invariant? (The Subtleties of "Neutrality")	209
6.4	Maxwell's Equations	218
6.5	Lenz's Law	225
6.6	4-Potential, Gauge Transformations, and Gauge Invariance	228
6.7	Electrodynamics and The Principle of the Least Action	233
6.8	Electrodynamics in Tensor Notations	239
6.9	Running Waves	244
6.10	The Relativistic Doppler Effect I	247
6.11	The Origin of Light	248
6.12	Aberration of Light – 2	252
6.13	Why Do Droplets Sparkle? Or Can We Trap the Light in a Droplet?	256
	Problems	263
<b>7</b>	<b>Relativistic Paradoxes</b>	<b>267</b>
7.1	Seeing and Observing (on the Appearance of Fast-Moving Objects)	267
7.2	Can We See the Relativistic Length Contraction?	273
7.3	The Lorentz Contraction Paradox	280
7.4	Predicaments of Relativistic Train	283
7.5	The Dynamics of Relativistic Length Contraction	298

7.6	The Conveyor Belt Paradox	317
7.7	What is Rigid in Relativity? (What Constitutes Deformation?)	323
7.8	The Twin Paradox	334
7.9	The Three Friends' Paradox	344
	Problems	348
<b>8</b>	<b>Miracles of a Spinning World</b>	<b>351</b>
8.1	The Ehrenfest Paradox	351
8.2	Circumnavigations with the Atomic Clocks	365
8.3	Surprises of the Rotland	375
8.4	Photons' Races in a Centrifuge	376
8.5	The Thomas Precession	387
	Problems	394
<b>9</b>	<b>Theory of Relativity is the Theory of Absoluteness</b>	<b>397</b>
9.1	What Is Relative and What Is Absolute	397
9.2	The Speed of Light and the Invariant Speed	398
9.3	Space-Time Intervals	403
9.4	Relativistic Doppler Effect II	407
9.5	Relative Is Real	413
	Problems	422
<b>10</b>	<b>Relativity at Work III: Quantum Mechanics</b>	<b>425</b>
10.1	Basic Ideas of Quantum Mechanics	425
10.2	Relativistic QM Indeterminacy	454
10.3	Relativistic Wave Equations	461
10.3.1	The Klein–Gordon Equation	461
10.3.2	Dirac's Equation	469
10.4	Relativistic Doppler Effect III: A Child of Relativity and Quantum Mechanics	477
10.5	Field–Particle Interactions: The Compton Effect	482
	Problems	493
<b>11</b>	<b>Relativity and Causality</b>	<b>497</b>
11.1	Space-Time and Causality	497
11.2	Tachyons and Tardyons	500
11.3	The Tolman Paradox	509
11.4	Tachyons and Causality	516
11.5	Wave Packet Propagation and Position Measurements	523
11.6	Superluminal Quantum Tunneling	527
11.7	Wave Front Propagation	537
11.8	What Constitutes a Signal?	541
11.9	Direct Signaling Into the Past	550

11.10	The Mystery of Quantum Telecommunication	558
11.11	The “No Cloning” Theorem	564
	Problems	569
<b>12</b>	<b>Applied Relativity</b>	<b>571</b>
12.1	Relativistic Jet Propulsion: A “Star Trek” Cruiser	571
12.2	Principles of Design and Functioning of Particle Accelerators	580
	Problems	593
<b>13</b>	<b>A Bit of General Relativity</b>	<b>595</b>
13.1	Basic Ideas of GR	595
13.2	Kinematics of GR	603
	<b>Appendix A State Function and the Continuity Equation</b>	<b>615</b>
	<b>Appendix B Representation of Observables by Operators</b>	<b>617</b>
	<b>Appendix C The Pauli Matrices</b>	<b>619</b>
	<b>Appendix D Dimensionality of Dirac’s Matrices</b>	<b>621</b>
	<b>Appendix E Optical Barriers for a Photon</b>	<b>623</b>
	<b>Appendix F Cause and Effect</b>	<b>627</b>
	<b>Appendix G Permittivity and Refractive Index</b>	<b>637</b>
	<b>References</b>	<b>643</b>
	<b>Index</b>	<b>647</b>
