

Index

a

adiabatic exponent 6
 advection equation 13
 amplification factor 142
 amplification matrix 143
 angle of attack 18
 angular velocity vector 15
 antidifference operator 134
 approximate solutions 116
 Archimedes 30
 Archimedes' principle 30
 artificial time 90
 asymptotically closed 117
 asymptotically regular 117
 Aw, A. 77
 Aw–Raschle model 77

b

back side of a shock 45
 basic discretization 208
 Bernoulli equation 16
 – generalized 17
 Bernoulli, Daniel 16
 Bois-Reymond, P. du 119
 Boltzmann constant 106
 Boltzmann, L. 49
 boundary layer 95
 boundary layer equations 99
 boundary layer theory 89
 box 206
 Brandt, G.B. 106
 Breuss, M. 71
 Briggs, H. 131
 Buchanan, J.E. 144
 Buckley–Leverett equation 71
 buoyancy
 – dynamic 14
 – static 26, 30
 Burgers' equation 10
 Burgers, J. 10

c

carburetor 16
 Cauchy–Riemann equations 20
 cell average 130
 centered waves 63
 CFL condition 114, 122, 136, 140, 159
 – stronger 161
 Chaplign solutions 28
 Chaplign, C.A. 28
 characteristic cone 76
 characteristic field 170
 – genuinely nonlinear 170
 – linearly degenerated 170
 characteristics 10–12, 41
 – numerical 135
 circulation 15
 Clausius, R.J.E. 49
 closing of disturbed laminar flow
 102
 congestion 38
 congestion velocity 47
 conservation laws 7
 conservation of
 – energy 1, 5
 – mass 1, 3
 – momentum 1, 3
 conservation principles xv, 1
 conservative variables 5
 consistency condition 138
 consistency of a numerical method
 122
 consistency of numerical methods
 133
 contact discontinuity 45, 171
 continuity equation 3
 continuous convergence 119
 – of relations 151
 contravariant components of a vector
 190
 contravariant metric tensor 192

- control volume 206
- convection term 5
- convergence of numerical methods 74, 117
- Courant, R. 114, 119, 135
- covariant basis vectors 190
- covariant components of a vector 191
- covariant metric tensor 192
- critical Reynolds number 89, 104
- curve of neutral stability 104

- d**
- density 1, 7
- density of momentum 3
- difference equation 128
- difference operator 127, 138
 - central 132

flux splitting scheme 124
 force
 – conservative 16
 Friedrichs, K.-O. 114, 135
 front side of a shock 45
 functional analysis of discretization
 algorithms 115
 fundamental diagram 38
 FVM on unstructured grids 148

g

gas
 – γ - 7
 – ideal 4
 Gasser, I. 106
 genuine solution 137
 genuinely nonlinear 63
 Glimm, J. 114
 global discretization error 140
 Godunov method
 – for Euler equation 185
 Godunov scheme 160
 Godunov, S.K. 74
 Greenshields' model 39
 grid 73
 grid generation 149, 196
 grid generation algebraic 198
 grid generation analytic 198
 grid generation cycle 202
 grid of C-type 196
 grid of H-type 197
 grid of O-type 197
 grid quality 197
 grid topology 196
 grid transformation 188

h

Hagen, G.H.L. 89
 Hagen-Poiseuille law 88
 Harriot, T. 131
 Harten, A. 121, 148
 heated gas flow 104
 Hilgenstock 201
 hodograph equation 28
 hodograph plane 27
 hydrodynamic paradoxon 16
 hydrostatic equation 29
 hydrostatic paradox 29
 Hyman, J.M. 121

i

implicit difference equation 128
 incremental form 157

infinitesimal generator 137
 iterative procedure 91

j

Jacobian matrix 7
 Jagger, S.F. 106
 jam concentration 38
 jet stream 16
 jump condition 44

k

Kantorowitch, L.W. 114
 Kelvin's theorem 17
 Kelvin, Lord of Largs 17
 Keyfitz, B. 125
 Kreiss matrix theorem 144
 Kreiss, H.-O. 144
 Kruzkov solution 70
 Kruzkov, S.N. 69, 121
 Kutta, M.W. 26
 Kutta–Zhukovsky buoyancy formulas
 26
 Kuznetsov, N.N. 59

l

Lahmann, J.-R. 104
 Laurent, P.A. 23
 Lax entropy solution 55
 Lax shock conditions 68
 Lax, P. 53, 121
 Lax–Friedrichs scheme 155
 Lax–Richtmyer theory 136
 Lax–Wendroff scheme 147
 Lax–Friedrichs method 164
 Lax–Friedrichs scheme 146
 Lax–Richtmyer theory 139
 Lax–Wendroff theorem 125
 Lea, C.J. 106
 Legendre transformation 27
 Lei, J. 126
 Leibniz, G.W. 131
 LeVeque, R.J. 125
 Lewy, H. 114, 135
 lift 26
 Lighthill, M.J. 39
 Lighthill–Whitham model 39, 77
 limiter 148
 local speed of sound 32

m

Mach number 18, 176
 Mach's angle 19
 Mach's cone 19

Mach's net 19
 Mach, E. 18
 main theorem of thermodynamics
 – first 5, 49
 – second 49
 material time derivative 5
 mathematical model xiii
 maximum principle 158
 method of
 – characteristics 19
 – hodographs 27
 method of artificial compressibility
 90
 method of conservation form
 122, 146
 modified equation 144
 monotone schemes 124
 monotonicity preserving 156
 Morton, K.W. 144
 multistep method 74
 Murman–Courant–Isaacson–Rees
 method 160

n

Napier, J. 131
 Navier, C.L.M.H. 83
 Navier–Stokes equations 83
 Neumann, J. von 141
 Newton's second law 3
 Nickel, K. 95
 no-slip condition 26, 106
 non-standard conservation law 71
 numerical domain of dependence
 135
 numerical flux function 155
 numerical viscosity coefficient 156

o

Oleinik solution 58
 Oleinik, O. 58
 one-step method 74
 optimal recovery 216
 order of a method 138
 order of a numerical procedure 133
 Orr–Sommerfeld equation 103
 Osher, St. 124

p

Panov, E.Y. 70
 parameter space 187
 partial slip 26
 Petrov–Galerkin schemes 129
 phase speed of perturbations 104

physical space 187
 Plum, M. 104
 Poise 83
 Poiseuille, J.L.M. 89
 polar coordinates 187
 polymer 72
 Prandtl number 85
 Prandtl, L. 89, 95
 pressure 6
 – dynamic 16
 – static 16
 – total 24
 primary grid 206
 primitive variables 5
 pseudospectral method 131

q

quasilinear systems of partial
 differential equations 7

r

Rankine–Hugoniot condition
 42, 44, 170
 Rankine–Hugoniot condition 76
 rarefaction wave 41, 68, 172
 Rascle, M. 77
 reconstruction of functions 74
 recovery polynomial 211
 Reynolds averaging 102
 Reynolds number 84
 – critical 89, 104
 Reynolds' transport theorem 2, 104
 Reynolds, O. 2
 Richtmyer, R.D. 114, 144
 ride impulse 41
 Riemann invariant 68
 Riemann invariants 170
 Riemann problem 39, 73
 – complete solution 178
 – local 160
 Riemann solvers 74
 Riemann, B. 39
 Rinow, W. 120
 round-off errors 140

s

scaled quantities 107
 scheme
 – (2k+1)-point 122, 146
 – 3-point 135, 146
 – upwind 136
 Schlichting, H. 97
 second law of thermodynamics 49

secondary grid 206
 semigroup property 137
 shallow water equations 35
 shift operator 131
 shift operator
 – backward 141
 – forward 142
 shock 42, 45, 68, 171
 shock conditions 68
 shock curve 45
 shock Mach number 176
 similarity solution 171
 slope limiting 214
 smooth connection of states 66
 solution operator 137
 – generalized 137
 Sommerfeld, A. 103
 sound propagation 29
 sound velocity, local 9, 32
 source terms 200
 spatial order of a FVM 210
 specific heats 7
 specific thermal conductivity 85
 spectral collocation method 131
 spectral discretizations 131
 spectral element method 131
 spectral Galerkin method 131
 stability
 – numerical 114, 139
 – of laminar flows 102
 – spatial 103
 – temporal 103
 stability criterions 143
 step size 74
 Stokes approximation 89
 Stokes, G.G. 83
 stream function 20
 streamline 9
 streamline diffusion methods 129
 stress tensor 80
 strictly hyperbolic 9
 Struckmeier, J. 106
 Stummel, F. 114
 sucking off of the boundary layer 99
 summation by parts 134
 symbol of a shift operator 141

t

Tadmor's lemma 165
 temperature 7
 test elements 70, 116
 test function 35

test functions 128
 thermal conductivity 105
 time step size 73, 122
 Tollmien, W. 95
 Tollmien-Schlichting waves 103
 traffic flow 37
 traffic jam 46
 transformed divergence term 195
 transformed Laplace equation 195
 transport theorem 2
 tribology 89
 truncation error 74, 133, 138
 tunnel fires 106
 TVB schemes 124
 TVD property 156
 TVD schemes 124
 Tveito, A. 71

u

unscaled quantities 107
 unstructured grids 130, 148, 218

v

Vainikko, G. 115
 variables
 – conservative 5
 – primitive 5
 velocity potential 15
 – complex 20
 viscosity 4, 72
 – kinematic 83
 viscosity coefficient 155
 – first 83
 – second 83
 viscosity form 156
 von Neumann stability criterion 144
 vortex line 15
 vorticity vector 15

w

Wang, C.Y. 89
 weak formulation of a numerical
 method 116
 weak solution 13, 35, 67, 116
 Wendroff, B. 125, 147
 Whitham, C.B. 39
 wing theory 89
 Winther, R. 71

z

Zhukovsky, N.J. 26
