Preface XI

Color Tables XIX

1	Light-Emitting Diodes and Lighting	1
	Introduction	1
1.1	Current-Conduction Mechanism in LED-Like Structures	4
1.2	Optical Output Power	6
1.3	Losses and Efficiency	7
1.4	Current Crowding	11
1.5	Packaging	15
1.6	Perception of Visible Light and Color	22
1.7	Visible-Light Terminology	27
1.7.1	Luminous Efficacy	29
1.7.2	Chromaticity Coordinates and Color Temperature	30
1.8	Inroads by LEDs	33
1.9	Nitride LED Performance	37
1.9.1	LEDs on Sapphire Substrates	38
1.9.1.1	Blue and Green LEDs	40
1.9.1.2	Amber LEDs	47
1.9.1.3	UV LEDs	48
1.9.1.4	Resonant Cavity-Enhanced LED	55
1.9.1.5	Effect of Threading Dislocation on LEDs	57
1.9.2	LEDs on SiC Substrates	60
1.9.3	LEDs on Si Substrates	61
1.9.4	LEDs Utilizing Rare Earth Transitions	62
1.10	On the Nature of Light Emission in Nitride-Based LEDs	64
1.10.1	Pressure Dependence of Spectra	65
1.10.2	Current and Temperature Dependence of Spectra	67
1.11	LED Degradation	70

1.12	LED Efficiency	76
1.13	Monochrome Applications of LEDs	82
1.14	Luminescence Conversion and White-Light Generation with Nitride LEDs	85
1.14.1	Color as Related to White-Light LEDs	87
1.14.2	Color Rendering Index	88
1.15	Approaches to White-Light Generation	91
1.15.1	White Light from Three-Chip LEDs	91
1.15.2	White Light from Four-Chip LEDs	97
1.15.3	Combining LEDs and Phosphor(s)	100
1.15.4	Other Photon Conversion Schemes	111
1.16	Toward the White-Light Applications	114
1.17	Organic/Polymeric LEDs (OLED, PLED)	122
1.17.1	OLED Structures	124
1.17.2	Charge and Energy Transport Fundamentals	132
1.17.3	Properties of Organic Crystals	135
1.17.4	Light Emission Dynamics	139
1.17.4.1	Nonradiative Recombination	143
1.17.4.2	Internal Conversion	143
1.17.4.3	Intersystem Crossing	143
1.17.4.4	Singlet Fission	143
1.17.4.5	Aggregation and Davydov Splitting	144
1.17.4.6	Charge-Transfer Excitons	145
1.17.5	OLED Devices	146
1.17.5.1	White OLEDs	147
1.17.5.2	Displays	151
1.17.6	Lighting with OLEDs	155
	References	157
2	Semiconductor Lasers	169
	Introduction	169
2.1	A Primer to the Principles of Lasers	172
2.2	Waveguiding	175
2.2.1	Refractive Index of GaN and AlGaN	176
2.2.2	Refractive Index of InGaN	180
2.2.3	Analytical Solution to the Waveguide Problem	180
2.2.4	Numerical Solution of the Waveguide Problem	184
2.2.5	Far-Field Pattern	191
2.3	Loss, Threshold, and Cavity Modes	194
2.4	Optical Gain	196
2.4.1	A Glossary for Semiconductor Lasers	208
2.4.2	Optical Gain in Bulk Layers: A Semiconductor Approach	215
2.4.2.1	Relating Absorption Rate to Absorption Coefficient	216
2.4.2.2	Relating Stimulated Emission Rate to Absorption Coefficient	217
2.4.2.3	Relating Spontaneous Emission Rate to Absorption Coefficient	217

2.4.2.4	Fermi's Golden Rule, Stimulated and Spontaneous Emission Rates, and Absorption Coefficient Within the k -Selection Rule	217
2.4.3	Gain in Quantum Wells	231
2.5	Coulombic Effects	235
2.6	Numerical Gain Calculations for GaN	239
2.6.1	Optical Gain in Bulk GaN	239
2.6.2	Gain in GaN Quantum Wells	241
2.6.3	Gain Calculations in Wz GaN Q Wells Without Strain	241
2.6.4	Gain Calculations in Wz Q Wells with Strain	241
2.6.5	Gain in ZB Q Wells Without Strain	244
2.6.6	Gain in ZB Q Wells with Strain	245
2.6.6.1	Pathways Through Excitons and Localized States	246
2.6.7	Measurement of Gain in Nitride Lasers	257
2.6.7.1	Gain Measurement via Optical Pumping	258
2.6.7.2	Gain Measurement via Electrical Injection (Pump) and Optical Probe Method	261
2.7	Threshold Current	262
2.8	Analysis of Injection Lasers with Simplifying Assumptions	263
2.9	Recombination Lifetime	264
2.10	Quantum Efficiency	267
2.11	GaN-Based LD Design and Performance	267
2.12	Gain Spectra of InGaN Injection Lasers	280
2.13	Near-UV Lasers	290
2.14	Reflector Stacks and Vertical Cavity Surface-Emitting Lasers (VCSELs)	293
2.15	Polariton Lasers	308
2.16	GaInNAs Quaternary Infrared Lasers	312
2.17	Laser Degradation	315
2.18	Applications of GaN-Based Lasers to DVDs	327
2.19	A Succinct Review of the Laser Evolution in Nitrides	330
	References	334
3	Field Effect Transistors and Heterojunction Bipolar Transistors	349
	Introduction	349
3.1	Heterojunction Field Effect Transistors	352
3.1.1	Electron Transport Properties in GaN and GaN/AlGaIn Heterostructures	353
3.1.2	Heterointerface Charge	356
3.1.3	Electromechanical Coupling	366
3.1.4	Analytical Description of HFETs	369
3.1.4.1	Examples for GaN and InGaN Channel HFETs	375
3.1.5	Numerical Modeling of Sheet Charge and Current	389
3.1.6	Numerically Calculated I–V Characteristics	398
3.2	The s -Parameters and Gain	401
3.3	Equivalent Circuit Models, Deembedding, and Cutoff Frequency	417

3.3.1	Small-Signal Equivalent Circuit Modeling	420
3.3.2	Large-Signal Equivalent Circuit Modeling	434
3.3.2.1	Nonlinearities	436
3.3.2.2	Dispersion and Temperature Effects	447
3.3.3	Cutoff Frequency	454
3.4	HFET Amplifier Classification and Efficiency	457
3.5	AlGaIn/GaN HFETs	463
3.5.1	Experimental Performance of GaN FETs	465
3.5.2	Power Amplifiers and Low-Noise Amplifiers (LNAs)	478
3.5.3	Drain-Voltage and Drain-Breakdown Mechanisms	483
3.5.4	Field Plate For Spreading Electric Field to Increase Breakdown Voltage	494
3.5.5	Anomalies in GaN MESFETs and AlGaIn/GaN HFETs	497
3.5.5.1	Effect of the Traps in the Buffer Layer	500
3.5.5.2	Effect of Barrier States	509
3.5.5.3	Field-Assisted Emission from the Barrier Traps	516
3.5.5.4	Defect Mapping by Kelvin Probe and Effect of Surface States	520
3.6	Electronic Noise	531
3.6.1	Shot Noise	532
3.6.2	Generation–Recombination Noise	533
3.6.3	Thermal Noise	534
3.6.4	Avalanche Noise	536
3.6.5	Low-Frequency Noise ($1/f$ Noise)	537
3.6.5.1	Nonfundamental $1/f$ Noise	537
3.6.5.2	Fundamental $1/f$ Noise	538
3.6.6	High-Frequency Noise	541
3.6.7	Treatment of Noise with FET Equivalent Circuit	544
3.6.8	$1/f$ Noise in Conjunction with GaN FETs	550
3.6.9	High-Frequency Noise in Conjunction with GaN FETs	558
3.7	Dielectrics for Passivation Purposes or Gate Leakage Reduction	563
3.8	Heat Dissipation and Junction Temperature	570
3.9	Hot Phonon Effects	577
3.9.1	Phonon Decay Channels and Decay Time	581
3.9.1.1	LO Phonon Decay Channels in Wurtzitic GaN	584
3.9.1.2	Implications for FETs	593
3.10	InGaIn Channel and/or InAlN Barrier HFETs	609
3.11	FET Degradation	612
3.11.1	Reliability Measurements	617
3.11.2	GaN HFET Reliability	619
3.11.2.1	Gate Current	624
3.11.2.2	Metallurgical Issues	628
3.11.2.3	Hot Electron and Hot Phonon Issues	629
3.11.2.4	Other Reliability Issues	633
3.12	Heterojunction Bipolar Transistors	635
3.12.1	HBT Fundamentals	638

3.12.1.1	Current Transport Mechanism Across the Heterojunction	639
3.12.1.2	Current Transport Mechanism Across Base	648
3.12.1.3	Electron Velocity Overshoot in the Collector Space Charge Region	657
3.12.1.4	Current Gain and Recombination Current of HBTs	659
3.12.1.5	Current Gain at High Currents	661
3.12.1.6	Emitter Current Crowding Effect	662
3.12.1.7	Noise in Bipolar Transistors	662
3.12.2	Nitride-Based HBTs	665
3.13	Concluding Comments	671
3.14	Appendix: Sheet Charge Calculation in AlGaIn/GaN Structures with AlN Interface Layer (AlGaIn/AlN/GaN)	672
	References	675
4	Ultraviolet Detectors	709
	Introduction	709
4.1	Principles of Photodetectors	713
4.1.1	Current and Voltage Response to Incident Radiation	718
4.1.1.1	Photoconductive Detectors	719
4.1.1.2	p–n-Junction Photovoltaic Detectors	720
4.1.2	Noise in Detectors	729
4.1.2.1	Thermal Noise	729
4.1.2.2	Shot Noise	730
4.1.2.3	Generation–Recombination Noise	731
4.1.2.4	1/f Noise	731
4.1.3	Quantum Efficiency	733
4.1.3.1	Quantum Efficiency in Photoconductors	733
4.1.3.2	Quantum Efficiency in a p–n-Junction Detector	734
4.1.4	Responsivity	738
4.1.5	Signal-to-Noise Ratio, Noise Equivalent Power, and Detectivity	738
4.1.5.1	Thermal Limited	740
4.1.5.2	Shot Current Limited	740
4.1.5.3	Generation–Recombination Limited	740
4.1.5.4	Background Radiation Limited	741
4.1.5.5	Noise in a p–n-Junction Detector	741
4.1.5.6	Detectivity for a p–n-Junction Detector	742
4.1.6	Surface and Bulk Recombination in Detectors	743
4.2	Particulars of Deep UV Radiation and Detection	744
4.2.1	Solar UV Radiation	746
4.2.2	Stratospheric Ozone and UV Absorption	747
4.2.3	Computational Method Called Plexus	747
4.2.4	UV Transmission of the Atmosphere	748
4.2.5	Number of Solar UV Photons Reaching Lower Altitudes	749
4.2.6	Atmospheric Detection Range	751
4.2.7	Inevitable and Unavoidable Losses of Photons	754

4.2.8	Practical UV Sensor Detection Ranges	756
4.2.9	Available UV Sensors	757
4.2.10	Design Requirements for UV Solar-Blind Imaging Detectors	759
4.3	Si and SiC-Based UV Photodetectors	762
4.3.1	Silicon-Based UV Photodetectors	763
4.3.2	SiC-Based UV Photodetectors	764
4.4	Nitride-Based Detectors	767
4.4.1	Photoconductive Detectors	768
4.4.2	Photovoltaic Detectors and Junction Detectors	775
4.4.2.1	GaN and AlGaN-Based Schottky Barrier Photodiodes	776
4.4.2.2	Metal–Semiconductor–Metal Detectors	782
4.4.2.3	p–n- and p-i-n-Junction Detectors	789
4.4.2.4	AlGaN/GaN Heterojunction Detectors	796
4.4.2.5	AlGaN Detectors Including the Solar-Blind Variety	801
4.4.2.6	AlGaN/GaN MQW Photodetectors	806
4.4.2.7	Heterojunction Phototransistors	808
4.4.2.8	GaN Avalanche Photodetectors	810
4.5	UV Imagers	814
4.6	Concluding Comments	819
	References	820
