

## Contents

	<b>Preface</b>	<i>IX</i>
<b>1</b>	<b>Introduction</b>	<i>1</i>
<b>Part I</b>	<b>Cluster Properties and Cluster Processes</b>	<i>3</i>
<b>2</b>	<b>Fundamentals of Large Clusters</b>	<i>5</i>
2.1	Models for Large Clusters and Processes with Their Participation	<i>6</i>
2.2	Stability of Charged Metal Clusters	<i>17</i>
2.3	Macroscopic Solid Particles with a Pairwise Interaction of Atoms	<i>23</i>
2.4	Macroscopic Solid Surfaces	<i>34</i>
2.5	Thermodynamics of Large Liquid Clusters in Parent Vapor	<i>47</i>
<b>3</b>	<b>Structures of Solid Clusters with Pairwise Atomic Interaction</b>	<i>53</i>
3.1	Clusters of Close-Packed Structures	<i>54</i>
3.2	Icosahedral Cluster Structures	<i>72</i>
3.3	Competition between Cluster Structures	<i>88</i>
<b>4</b>	<b>Elementary Processes and Processes in Gases Involving Clusters</b>	<i>99</i>
4.1	Cluster Collision Processes	<i>100</i>
4.2	Attachment of Atoms to Clusters and Cluster Evaporation	<i>106</i>
4.3	Cluster Heat Processes in Gases	<i>120</i>
4.4	Combustion and Catalytic Processes in Gases Involving Clusters	<i>122</i>
<b>5</b>	<b>Clusters in External Fields</b>	<i>131</i>
5.1	Electric Properties of Large Clusters	<i>132</i>
5.2	Radiative Processes Involving Small Particles	<i>143</i>
5.3	Resonance Absorption of Metal Clusters	<i>152</i>
5.4	Radiative Processes in the Heat Balance and Relaxation of Clusters	<i>165</i>
5.5	Hot Clusters as Light Sources	<i>168</i>
<b>Part II</b>	<b>Cluster Processes in Gases</b>	<i>173</i>
<b>6</b>	<b>Cluster Transport in Gases and Diffusion-Limited Association of Clusters</b>	<i>175</i>
6.1	Transport of Large Clusters in Gases	<i>175</i>
6.2	Dynamics of Cluster Motion in Gases	<i>184</i>

6.3	Cluster Motion in Gas Flows	189
6.4	Pairwise Association of Clusters Limited by Motion in a Gas	199
<b>7</b>	<b>Charging of Clusters in Ionized Gas</b>	<b>205</b>
7.1	Attachment of Ions to Clusters in Dense Gas	205
7.2	Field of a Charged Cluster in Dense Ionized Gas	212
7.3	Attachment of Ions to Clusters in Rare Gas	219
7.4	Kinetics of Cluster Charging in Ionized Gas	234
<b>8</b>	<b>Ionization Equilibrium of Clusters in a Gas</b>	<b>239</b>
8.1	Ionization Equilibrium for Large Metal Clusters	239
8.2	Electron Thermoemission of Metal Clusters	248
8.3	Ionization Equilibrium for Large Dielectric Clusters	257
<b>9</b>	<b>Kinetics of Cluster Growth</b>	<b>265</b>
9.1	Cluster Growth Involving Free Atoms	267
9.2	Kinetics of Cluster Coagulation	280
9.3	Cluster Growth During Gas Expansion in a Vacuum	284
9.4	Cluster Growth through Coalescence	287
9.5	Heat Regime of Cluster Growth	294
9.6	Cluster Growth in a Hot Gas with Metal-Containing Molecules	300
<b>Part III</b>	<b>Complex Plasma</b>	<b>311</b>
<b>10</b>	<b>Dusty Plasma</b>	<b>313</b>
10.1	Particles in the Positive Column of Glow Discharge	313
10.2	Particles in Traps of Gas Discharge	318
10.3	Structures of Particles in Dusty Plasma	327
<b>11</b>	<b>Aerosol Plasma</b>	<b>331</b>
11.1	Growth and Charging of Aerosol Particles in an External Electric Field	332
11.2	Electrical Processes in Aerosol Plasma	341
11.3	Growth of Fractal Structures Involving Solid Clusters	354
<b>12</b>	<b>Cluster Plasma</b>	<b>363</b>
12.1	Clusters in a Dense Arc Plasma	364
12.2	Laser Generation of Metal Clusters	370
12.3	Generation of Clusters from a Metal Surface	376
12.4	Generation of Metal Clusters in Magnetron Discharge	385
12.5	Cluster Flow through an Exit Orifice	398
12.6	Instability of Cluster Plasma	401
<b>13</b>	<b>Conclusion</b>	<b>407</b>
<b>Appendix A</b>	<b>Mechanical and Electrical Parameters of Particles with Ellipsoidal and Similar Shapes</b>	<b>413</b>
A.1	The Effective Hydrodynamic Radius [340]	413
A.2	Capacity (C)	415

A.3 Polarizability 416

**Appendix B Conversion Factors of Cluster Physics** 419

**Appendix C Thermodynamic Parameters of Elements** 421

**References** 423

**Index** 431
