Readings in Planning Theory

NEW EDITION

3rd Edition

Edited by Susan S. Fainstein & Scott Campbell

Harvard University, USA;
University of Michigan, USA

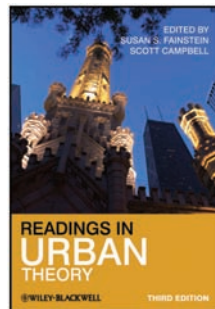

"This trenchant volume succeeds in a vital way: it provides a framework for theories of planning that will enable planning students and practitioners to explain their chosen field much more cogently."

Lawrence J. Vale, Massachusetts Institute of Technology

While maintaining an emphasis on understanding the process and substance of planning within real world constraints, the readings in this third edition reflect the rapidly changing dynamics of today's globalized world. Updated with thirteen new readings, it addresses the changing approaches to modernism, urbanism, communicative action, power, inequality, and justice in the city.
