Detailed Description of the Collection

<p>Mass Spectra of Pharmaceuticals and Agrochemicals 2006</p> <p>Available Database Formats: Agilent MSD Chemstation Benchtop/SPC Excalibur Finnigan GCQ, SSQ, TSQ, ICIS, Magnum, INCOS, ION Trap Fisons VG Masslab, VG LabBase NIST PE TurboMass Shimadzu QP-5000 Varian Saturn, ITS-40</p>	<p>This high quality mass spectral collection includes compounds which are subject to the drug trafficking laws as well as their precursors, by-products and metabolites. Medical drugs and drugs with psychotropic effects are contained, too. Another compound group included in the collection implies pesticides such as insecticides, acaroids, nematocides, fungicides, rotenticides, molluscicides and repellents. Other classes are toxic compounds (e.g. strychnine), PCB's and anabolics.</p> <p>The mass spectra are unreduced with an average number of peaks > 90. Chemical structure, synonym and systematic name, molecular weight, molecular formula and experimental conditions complete the data record.</p>
