

Sept 27/88

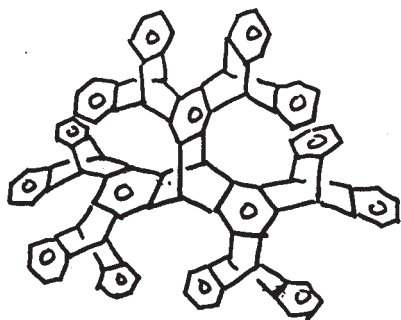

How nice to have Professor Nozoe in the audience here in Sendai as I describe for the first time our recent results on the synthesis of cuppedophane, cappedophane and supertritycene —

cuppedophane

cappedophane

supertritycene

$C_{104}H_{62}$ , but  
sublimable!

It was good to see you again, and especially so strong and healthy — with best wishes for many more years of good chemistry —

Harold Hart
