

I testify that, since the Opening Ceremony for volume IX of

NOZOE SENSEI CHIMICA ACTA
in 1985

Nozoe Sensei is still a very strong editor of this volume and also a very active chemist in the field of nonbenzenoid aromatic compound — a field which he started successfully more than 50 years ago.

Good luck for the big book on "Comprehensive Treatise on the Chemistry of Tropylium Chemistry"! TO BE PUBLISHED SOON AND TO BE ALSO AFTER THE YEAR 2000!

Tokyo, 14th June 1989
