Professor Nozoe:

It's my second time to meet you in Taiwan. It's really my honor. Professor Lin is my teacher and he always mentions about you. Thank you for encouraging me to study more. I'll try my best and I hope I can have the spirit as you.

Wish you healthy and happy.

Yi-chun Chao

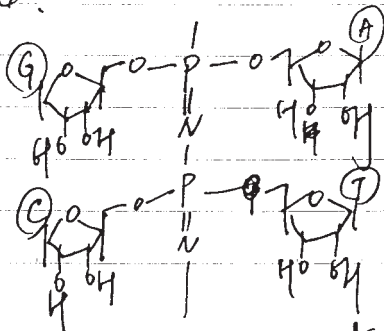

National Taiwan Univ

Dept of Chemistry.

Professor Nozoe:

It's my honor to have a chance to discuss with you about "Tropalone" project. Also, I feel very exciting to cooperate with you. I believe we will have great results in the near future.

This is my new ideal. It is one type of new biopolymers.

With my best

regards,
Shun-chen
