

My interests are mass spec, n.m.r.,
 The power of these stretches far,
 The choice for me was not easy,
 But my syntheses weren't so breezy,
 Leading to gums or crystals doughy,
 - Not at all like those Nozoe.

If I ever return to the fold,
 Trying syntheses new, crazy, or old,
 My annulenes won't rise to par
 And my tropolones will come out as far.

To the who worked in Taiwan,
 And later impressed all Japan,
 With his crystals blue, white and black,
 - We say to you please come back.

7/29/66

24th Sept., 1966. Dudley Williams

Pat. Williams
 Coal Horse
 Tramping ton.

Ostreogrynan A.

Yes, again!!

F. Sondheimer

Fortunately Dr. Williams is better
 at chemistry than he is at poetry!

His formula is good but his rhymes are shocking.

To be with Nozoe is always a pleasure - may we be together
 again soon.

Todd 25/9/66.

Not to mention

B. Sondheimer
