

October 7th 1983

On the occasion of seeing Professor
Tetsuo Nozoe again here in Tokyo
in Prof. Mikami's office:

Professor Nozoe: you look
still like the young man
of 30 years ago and look
as active as ever. I give
you my best wishes, wish to
meet you in the future.
Since you asked for (ordered!)
a new present, here it is:

Coenzyme F430
from Methanogen
bacteria

Your old (younger but
much less vigorous) friend

Allen E. Martell &
Elizabeth E. Martell
