

An International Journal

Impact Factor*:
2.949

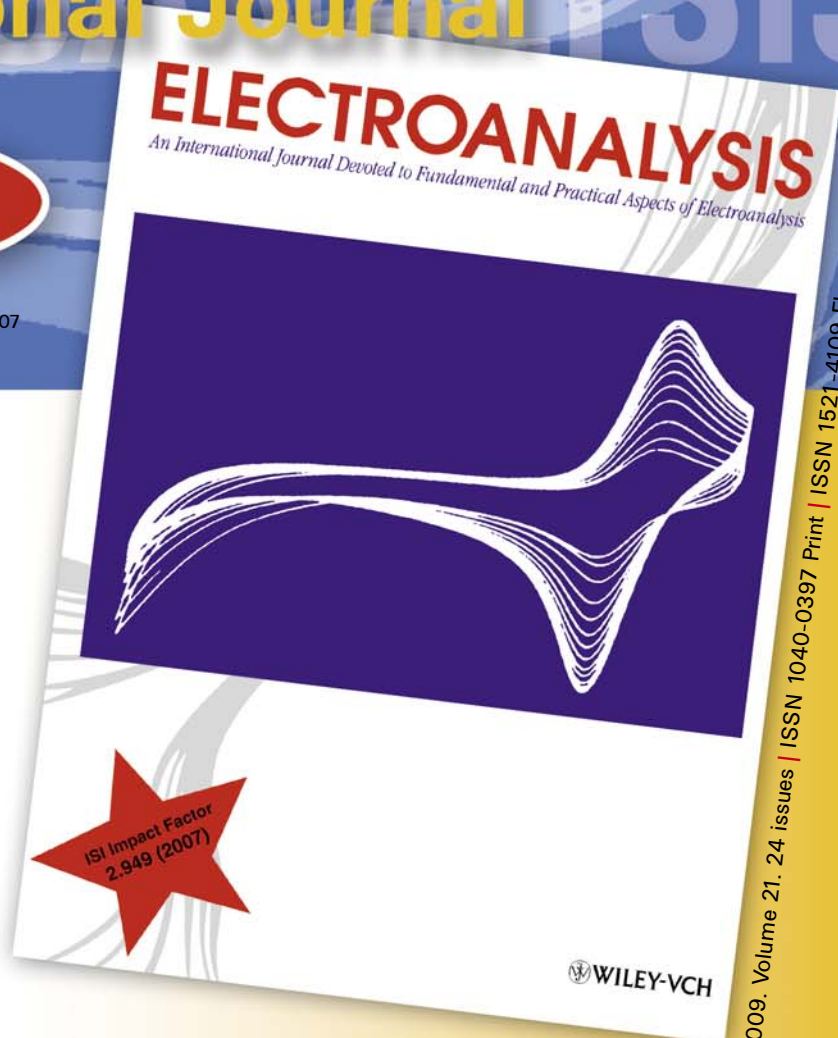

*Thomson Reuters Citation Report 2007

Editor-in-Chief

Joseph Wang
Department of NanoEngineering
University of California
San Diego
La Jolla, USA

Editorial Board

Eric Bakker, Curtin University, Australia
Alan M. Bond, Monash University, Australia
Gary D. Christian, University of Washington, USA
Richard G. Compton, Oxford University, UK
Serge Cosnier, University Joseph Fourier, France
James A. Cox, Miami University, USA
John J. Gooding, University of New South Wales, Australia
Lo Gorton, Lund University, Sweden
William R. Heineman, University of Cincinnati, USA
Arkady A. Karyakin, Moscow State University, Russia
Jean-Michel Kauffmann, Free University of Brussels, Belgium
Mark E. Meyerhoff, University of Michigan, USA
José M. Pingarrón Carrazón, University Complutense of Madrid, Spain
Ernö Pretsch, ETH Zürich, Switzerland
James F. Rusling, University of Connecticut, USA
Frieder Scheller, Max Delbrück Center for Molecular Medicine, Germany
Wolfgang Schuhmann, Ruhr-University Bochum, Germany
Malcolm R. Smyth, Dublin City University, Ireland
Zbigniew Stojek, University of Warsaw, Poland
Karel Stulík, Charles University, Czech Republic
Erkang Wang, Chinese Academy of Sciences, Republic of China
Itamar Willner, Hebrew University, Israel

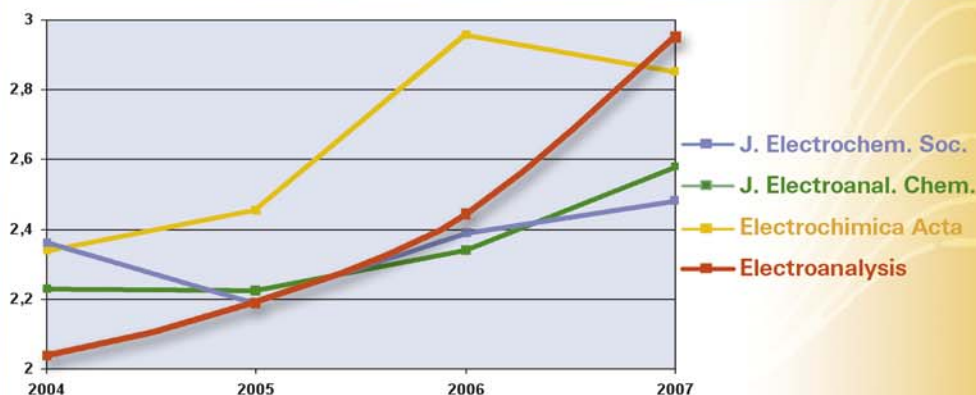

2009, Volume 21, 24 issues | ISSN 1040-0397 Print | ISSN 1521-4109 Electronic

Your **number one source** for information on electroanalytical chemistry, including both fundamental and application papers

Publishing **the latest innovations** in practical clinical, environmental and industrial applications

Constantly **increasing ISI Impact Factor**

Top Accessed 2008 Articles

■ Nanocomposites: From Fabrications to Electrochemical Bioapplications

Y.Xiao, C.M.Li
(Review) 2008, 20 (6), 648-662

■ Design of Amperometric Biosensors and Biofuel Cells by the Reconstitution of Electrically Contacted Enzyme Electrodes

M.Zayats, B.Willner, I. Willner
(Review) 2008, 20 (6), 583-601

■ Voltammetry of Undiluted Red-Ox Systems. Electrochemical ESR- and Electrochemical Impedance Spectroscopy Evidence for Formation of Ionic Liquid at Microelectrode Surface

M. Donten, A. Nowicka, M. Palys, J. Szydłowska, Z. Stojek
(Full Paper) 2008, 20 (1), 9-13

■ Electroanalytical Applications of Microporous Zeolites and Mesoporous (Organo)Silicas: Recent Trends

A. Walcarius
(Review) 2008, 20 (7), 711-738

■ Advances in Interfacial Design for Electrochemical Biosensors and Sensors: Aryl Diazonium Salts for Modifying Carbon and Metal Electrodes

J. J. Gooding
(Review) 2008, 20 (6), 573-582

SPECIAL ISSUES IN 2009

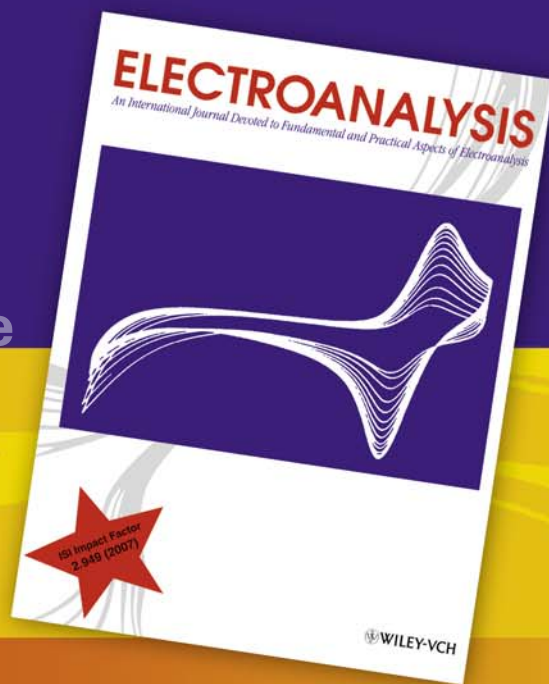

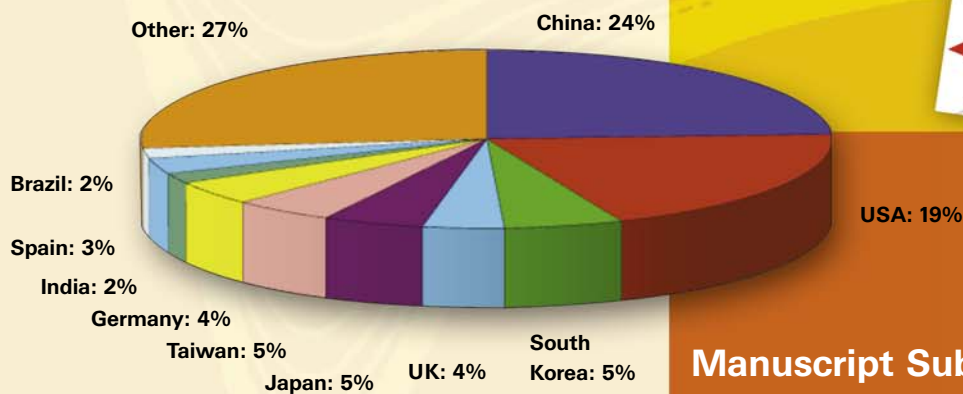

■ ESEAC 2008

■ Aptamer-based Electronic Devices

■ Modern Potentiometric Sensors
