

Post-Translational Modifications of Proteins: From Discovery to Functional Analysis

Uppsala, Sweden, August 22-24

A panel of experts will introduce participants to the methods for discovery and analysis of post-translational modifications.

Visit <http://cwp.embo.org/pc10-06> for more information

MPSA 2010

Uppsala, Sweden, August 25-28

18th International Conference of Methods in Protein Structure Analysis

Organized by the International Association for Protein Structure Analysis
and Proteomics

Topics Include: methods in proteomics analysis, folding and misfolding,
protein evolution and design, and membrane proteins

Multiple minireview series representing some of the outstanding talks from past meetings can be found in the *FEBS Journal*, including the latest on Dynamic interactions of proteins in complex networks, *FEBS J* Volume 276 (19) October, 2009
