

A European Journal of  
**CHEMPHYSICHEM**  
Chemical Physics and Physical Chemistry

## SCOPE

CHEMPHYSICHEM is well on its way to becoming the premier international source for important primary and critical secondary information across the whole field of physical chemistry and chemical physics. It integrates this wide and flourishing field ranging from atmospheric science to hard and soft condensed matter, from femtochemistry to nanotechnology, from complex biological systems to single molecule research, from clusters and colloids to catalysis and surface science - to name just a few topics.

What Nature and Science are for all the sciences, CHEMPHYSICHEM should become for physical chemistry and chemical physics.

## FOCUS

Physical Chemistry and Chemical Physics, Solid State and Soft Matter Research, Electro- and Photochemistry, Femtochemistry and Nanotechnology, Complex Systems and Single Molecule Research, Clusters and Colloids, Catalysis and Surface Science, Biophysics and Physical Biochemistry, Atmospheric and Environmental Chemistry and many more
