

## EMBO Molecular Medicine

EMBO Molecular Medicine is a leading journal in the field of molecular medicine, publishing research on human diseases and their molecular basis. The journal covers a wide range of topics, including:

- Inflammation** – Molecular mechanisms of inflammation and its role in disease
- Multiple Sclerosis** – Molecular mechanisms of Multiple Sclerosis and its treatment
- HIV-1** – Molecular mechanisms of HIV-1 infection and its treatment
- Vaccine** – Molecular mechanisms of vaccine development and its application
- Prion** – Molecular mechanisms of prion protein and its role in neurodegenerative diseases
- neuroprotective activity in transgenic mice** – Molecular mechanisms of neuroprotection and its application in transgenic mice
- RNAi based therapy** – Molecular mechanisms of RNAi based therapy and its application
- antibiotics** – Molecular mechanisms of antibiotic resistance and its treatment
- TRPM3** – Molecular mechanisms of TRPM3 and its role in disease
- varicint-waddler phenotype** – Molecular mechanisms of varicint-waddler phenotype and its application
- cerebellar ataxia** – Molecular mechanisms of cerebellar ataxia and its treatment
- Drosophila melanogaster** – Molecular mechanisms of Drosophila melanogaster and its application
- DNA-damage repair** – Molecular mechanisms of DNA-damage repair and its application
- Insulin-secreting cells** – Molecular mechanisms of insulin-secreting cells and its application
- cellular immunity** – Molecular mechanisms of cellular immunity and its application
- cancer stem cells** – Molecular mechanisms of cancer stem cells and its application
- genome-wide screen** – Molecular mechanisms of genome-wide screen and its application
- miRNA biomarkers** – Molecular mechanisms of miRNA biomarkers and its application

### Senior Editors:

Dario R. Alessi GB  
Giulio Cossu IT  
Uta Francke US  
Fred H. Gage US  
Matthias Hentze DE  
Edison T. Liu SG  
Philippe Sansonetti FR  
Bart de Strooper BE

Published on behalf of the  
European Molecular Biology Organization  
[www.embo.org](http://www.embo.org)

### A new journal where molecular biology meets clinical research

### Launching in 2009

- Publishes leading research offering
  - novel molecular insights into human diseases
  - new perspectives for clinical application
- Guaranteed quality; rapid & transparent peer review
  - internationally renowned Senior Editors & Advisory Board
- Fosters collaborations between clinicians & researchers
  - access to broad-based EMBO research communities
- Rapid publication of biomedical research articles & reviews
  - published online & printed monthly
- Free access to all content for first two years
  - guarantees high visibility for authors
- Conforms to Wellcome Trust, RCUK & NIH Open Access guidelines

For more information on how to submit your paper visit
