

WILEY

New Medical eTextbook Collection

Acurated collection for today's medical student

Wiley's unique portfolio covers academic titles aimed at instructors, students, professionals and generalists.

We have selected **184** of our most successful titles from across our Textbook, Professional, Reference and Trade publishing groups to curate a fully rounded collection. Here, faculty and students benefit not only from the pedagogical structure of our textbooks and reference works, designed to reflect the coverage of an academic course, but also from the accessible and practical application focus of our professional and trade titles, many by leading name authors.

Engage your students: Current and topical examples and data are covered throughout, across numerous titles.

Enhance your Medical School with our collection of titles covering the core disciplines of a medical and health sciences programme.

Anatomy & Physiology	Anesthesia	Biostatistics	Cardiology	Dermatology	Embryology
Emergency Medicine	Endocrinology & Metabolism	Ethics	Family & General Practice	Gastro-enterology	Genetics
Geriatrics	Gynaecology & Obstetrics	Haematology	Immunology	Infectious Diseases	Internal Medicine
Microbiology	Neurology	Neuroscience	Oncology	Ophthalmology	Orthopedics
Pain Management	Pediatrics	Pharmacology	Psychiatry	Public Health	Pulmonary & Thoracic Medicine
Radiology	Rheumatology	Sciences	Surgery	Tropical Medicine	Urology

Core, recommended textbooks

Best-selling, highly recommended textbooks for core modules.

Our world-renowned textbooks offer coverage, across the curriculum with accompanying instructor resources to help you plan and deliver effective classes, such as:

- PPT slides
- Instructor manuals
- Videos
- Image galleries
- Test banks
- and more...

Titles from our Best-selling Series

Lecture Notes

The series covers over 35 subjects providing the concise core knowledge required by medical students and junior doctors.

Each book is written by an expert teacher in note form, with bullet lists, illustrations, and summary boxes.

A panel of medical students reviews each text to ensure that the coverage is exactly right for its audience. Ideal as course textbooks or revision aids.

Titles from our Best-selling Series

At A Glance

Popular among healthcare students, residents, and newly qualified practitioners for its concise and simple approach and excellent illustrations.

Each bite-sized chapter is covered in a double-page spread with clear, easy-to-follow diagrams, with succinct explanatory text.

Covering a wide range of topics, books in the *at a Glance* series are ideal as introductory texts for teaching, learning and revision, and are useful throughout university and beyond.

Titles from our Best-selling Series

ABC

An accessible, highly visual and up-to-date source of knowledge for those in primary care, for trainee doctors and students.

Titles from our Best-selling Series

Essentials

Essentials are an international, best-selling series of textbooks, all of which are designed to support lecture series or themes on core topics within the health sciences.

Dummies are for students too!

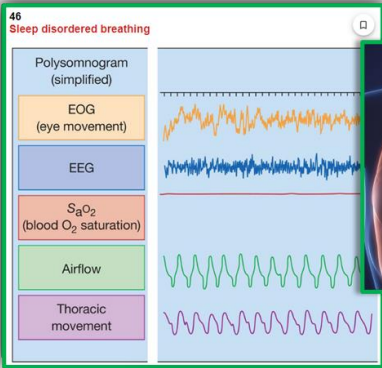

Dummies has always stood for taking on complex concepts and making them easy to understand. Dummies helps students be more knowledgeable and confident in applying what they know. Whether it's to pass that big test or expand their knowledge, students can rely on Dummies to learn the critical skills and relevant information necessary for success in their courses and future careers.

Examples

Examples relevant to today's students

Thrombosis and the COVID-19 pandemic

During the COVID-19 pandemic starting in late 2019, it became apparent that patients with severe COVID-19 infection had a higher rate of venous thrombosis than would be expected for people with a similar level of illness. Some of these thromboses were due to classic risk factors such as immobility and inflammation. However, there was also an increase in small segmental and subsegmental pulmonary emboli without evidence of deep vein thrombosis. These have been termed *immunothromboses* and are thought to arise from inflammation of the pulmonary vasculature rather than from deep vein thromboses breaking away to form pulmonary emboli. The pathological basis of these immunothromboses and whether they need different treatment from classic pulmonary emboli are still topics of debate.

There has also been a risk of an exceptionally rare thrombotic syndrome following COVID-19 vaccination using adenoviral vaccines such as the ChAdOx1 nCoV-19 vaccine. This has been termed *vaccine-induced thrombosis and thrombocytopenia* (VITT). VITT is due to antibodies forming against platelet factor 4 leading to formation of thromboses. This has a similar mechanism to heparin-induced thrombotic thrombocytopenia. VITT has often manifested as cerebral venous sinus thromboses associated with thrombocytopenia and has been challenging to treat. The mainstay of treatment has been anticoagulation and intravenous immunoglobulin. The risk of death of thrombosis from COVID-19 infection remains very much higher than the risks from the vaccines.
