	Whitfield, A. et al. (ed.): Fish and Fisheries in Estuaries. A Global Perspective. 2 Volume Set 2021/12. 1000 pp. HC. Approx. € 165.00 / £ 135.00 ISBN: 978-1-4443-3667-2 Weblink: http://www.wiley-vch.de/publish/en/books/ISBN978-1-4443-3667-2/ Fish and Fisheries in Estuaries: A Global Perspective brings together the current state of knowledge of estuarine fish in two volumes. Featuring contributions by more than fifty internationally-recognized researchers and estuarine ichthyological specialists, this landmark resource covers fish assemblages and functional groups, recruitment and production in estuaries, feeding ecology and trophic dynamics, conservation of estuarine fish, and much more. Thirteen in-depth chapters examine major aspects of fish and fisheries in estuaries throughout the world. The text describes the biology of estuarine fish and their connections with estuarine ecosystems, and examines the ways human industrialization and global events such as climate change are impacting both native and non-native species. Topics include habitat diversity, fish foraging behavior, ecological engineering tools and models, hazards and risks to estuarine fish and fisheries, and estuarine environmental health. Offering detailed information on the biology and ecology of estuarine fish and fisheries, this authoritative reference: * Explores current approaches and future research directions aimed at achieving a balance between exploitation and conservation of estuarine fishes * Discusses environmental quality objectives and sustainable management of estuary fisheries * Addresses the impacts of humans' increased use of resources such as food, space, and water to estuarine fisheries * Features numerous international case studies of management of fisheries, threatened species, estuarine rehabilitation, reproduction and ontogeny, and others * Covers study and sampling methods, field equipment, and data processing, analysis, and interpretation Fish and Fisheries in Estuaries: A Global Perspective is an indispensable tool and reference point for fish biologists, fisheries scientists, ecologists and environmental scientists, aquatic ecologists, conservation biologists, and advanced students and instructors in fish biology and fisheries programs.
