Parrill, A. L. / Lipkowski, K. B.: Reviews in Computational Chemistry, Volume 32
Volume 32 in the series ‘Reviews in Computational Chemistry’
2022/06. 256 pp. HC. Approx. € 272.00 / £ 224.00
ISBN: 978-1-119-62589-6
"Reviews in Computational Chemistry remains the most valuable reference to methods and techniques in computational chemistry." -- Journal of Molecular Graphics and Modeling

Moloney, M. G.: Organic Reaction Mechanisms 2019
Series ‘Organic Reaction Mechanisms’
2022/06. 336 pp. HC. Approx. € 510.00 / £ 420.00
ISBN: 978-1-119-60827-1
Latest edition of this annual review series - the only book series to summarise the latest progress on organic reaction mechanisms

Series ‘Wiley series in drug discovery and development’
2022/06. 608 pp. HC. Approx. € 229.00 / £ 189.00
ISBN: 978-1-119-78340-4

Series ‘Wiley series in drug discovery and development’
2022/06. 608 pp. HC. Approx. € 232.00 / £ 190.00
ISBN: 978-1-119-73755-1

Chang, M. (ed.): Principles in Microbiome Engineering
Series ‘Advanced Biotechnology’
2022/06. 336 pp, 150 figures, 50 in color. HC. € 149.00 / £ 125.00
ISBN: 978-3-527-34725-4
This book not only introduces the reader to the necessary tools to understand microbiome but also discusses many relevant areas of current research and applications of microbiome engineering, ranging from human diseases to husbandry, food and beverage applications.

Yang, Y. et al. (ed.): Multi-Scale Biogeochemical Processes in Soil Ecosystems. Critical Reactions and Resilience to Climate Changes
Series ‘Wiley-IUPAC Series Biophysico-Chemical Processes in Environmental Systems’
2022/07. 352 pp. HC. Approx. € 209.00 / £ 170.00
ISBN: 978-1-119-48034-1
This book provides an overview of the most up-to-date research about soil biogeochemical processes ranging from the molecular-scale phenomena to global-scale modeling, as well as applications in ecosystem management to mitigate greenhouse gas emission and the harmful effects of climate change.
Alza, E. (ed.): *Flow and Microreactor Technology in Medicinal Chemistry*
Series ‘Methods and Principles in Medicinal Chemistry’
2022/07. 336 pp, 149 figures, 149 in color, 10 tables. HC. € 139.00 / £ 115.00
ISBN: 978-3-527-34689-9
Computer-controlled chemical synthesis using flow chemistry microreactors is the key enabling technology for the chemistry laboratory of the future. Early adopters of this ground-breaking technology describe current and future uses in medicinal chemistry.

2022/07. 1500 pp. HC. Approx. € 430.00 / £ 350.00
ISBN: 978-1-119-64855-0
Completely revised and updated, the must-have work for every specialist in forensic medicine, forensic toxicology, forensic haemogenetics, any clinician who has to prepare a report for court and of course for lawyers.

Evans, P. A. (ed.): *Organic Reactions, Volume 109*
Volume 109 in the series ‘Organic Reactions’
2022/07. 1136 pp. HC. Approx. € 460.00 / £ 375.00

|        | Vyas, A. K. et al. (ed.): *Artificial Intelligence for Renewable Energy Systems*  
Series ‘Artificial Intelligence and Soft Computing for Industrial Transformation’  
2022/05. 272 pp. HC. Approx. € 179.00 / £ 148.00  
Renewable energy systems, including solar, wind, biodiesel, hybrid energy and other relevant types, have numerous advantages compared to their conventional counterparts. This book presents the application of machine learning and deep learning techniques for renewable energy system modeling, forecasting, and optimization for efficient system design. |
|        | Hemalatha, R. J. et al.: *The Internet of Medical Things (IoMT).* Healthcare Transformation  
Series ‘Advances in Learning Analytics for Intelligent Cloud-IoT Systems’  
2022/05. 336 pp. HC. Approx. € 209.00 / £ 171.00  
The book explores the emerging IoMT ecosystem - the application of wearable and stand-alone sensor-based tools and devices for patient monitoring and patient information. |
|        | Panda, S. K. et al. (ed.): *The New Advanced Society.* Artificial Intelligence and Industrial Internet of Things Paradigm  
Series ‘Wiley-Scrivener’  
2022/06. 512 pp. HC. Approx. € 209.00 / £ 170.00  
Included in this book are the fundamentals of Society 5.0, artificial intelligence, and the industrial internet of things, featuring their working principles and application in different sectors. |
|        | Pramanik, S. et al. (ed.): *Cyber Security and Network Security*

Geophysical monitoring is critically important to ensure safe and long-term geologic carbon storage. However, there is no single book on geophysical monitoring for geologic carbon storage. Therefore, it is right timing to publish a monograph in this topic to provide a comprehensive reference book in geophysical techniques for monitoring geologic carbon storage.

A complete update and review of progresses in the field of remote sensing of natural hazards over the past decade. A comprehensive volume that covers several aspects of studies of the natural hazards, including monitoring, detection, theories and modeling of natural hazards (floods, landslides, earthquakes, tornados, etc. using diverse remote sensing techniques.

A comprehensive volume focusing on the varied applications of isotopes with uniquely highlighting the various modeling approaches developed over the years to understand Earth processes and to further address various environmental problems.

<td>Presents a comprehensive overview of history, theory, practice and application of attributes and meta-attributes, novel quantitative tools for seismic interpretation that can assist with analysis of a wide range of geological and geophysical investigations.</td>
<td></td>
<td></td>
<td></td>
<td>This book provides an oversight of the fundamentals and the developments of nutraceuticals and natural products. It addresses the different types of synthesis and extraction methods, various characterization techniques, and clinical validation of different categories of these products. Their uses in preventive medicine, supplementary nutrition, drug discovery and drug delivery as well as the role of nanotechnology in administering these applications have been discussed with emphasis. Pharmaceutical alternatives based on carbohydrates, proteins, amino acids, herals, flavonoids, phytochemicals, marine sources, GMOs, and Non-GMOs are other topics of major discussion. To a large extent, the focus of the book is on the nanomaterial and nanochemical aspects these products. This book is an essential read for those who produce nutraceuticals and natural products and those who seek to incorporate different technologies and mechanisms in the developments of food/beauty/medicinal products.</td>
<td>This collection of original essays by an interdisciplinary group of leading scholars will serve as a comprehensive overview of the current state of American agricultural history. It is an introductory synthesis of the most important scholarly literature on the subject of agricultural history.</td>
