The balance provided by this volume is difficult to emulate. I anticipate readers to be drawn to the essays for their high quality, critical insights and capability to inform with new knowledge on particular conflict and peace issues. The criticism that it might draw would be one of quantity, meaning readers might want more for each of the five sections of the volume, as opposed to quality.

It addresses the different types of synthesis and extraction methods, various characterization techniques, and clinical validation of different categories of these products. Their uses in preventive medicine, supplementary nutrition, drug discovery and drug delivery as well as the role of nanotechnology in administering these applications have been discussed with emphasis. Pharmaceutical alternatives based on carbohydrates, proteins, amino acids, herbals, flavonoids, phytochemicals, marine sources, GMOs, and Non-GMOs are other topics of major discussion. To a large extent, the focus of the book is on the nanomaterial and nanochemical aspects these products. This book is an essential read for those who produce nutraceuticals and natural products and those who seek to incorporate different technologies and mechanisms in the developments of food/beauty/medicinal products.

Approx. € 165.00 / £ 135.00 ISBN: 978-1-119-66850-3 Weblink: http://www.wiley-vch.de/publish/en/books/ISBN978-1-119-66850-3/ It is the first Melville Companion to include an entire section on book history and digital humanities. Digital approaches are reflected throughout many of the essays. It offers concise but intensely scholarly new readings of and critical methods for Melville's works by leading researchers across the world. It has a unique section devoted to environmental humanities approaches to Melville. It has two unique 'symposium' sections that feature short essays reflecting on artistic responses, teaching, and public engagement with Melville.
